

PRESS RELEASE

HEALTHY LIGHT FOR CHILDREN ES-SYSTEM DELIVERED LIGHT FOR AN ELEMENTARY SCHOOL IN THE NETHERLANDS

ES-SYSTEM, the leading Polish company specializing in professional lighting, has delivered lighting equipment to the SWS De Zoutkamperril elementary school in Zoutkamp in the Netherlands. 100% LED lighting was used to meet the requirements of this project, as it ensures the maximum energy efficiency of the building thanks to the use of luminaires of the highest quality that guarantee access to healthy light for the children attending the school. This is another of numerous lighting projects at educational facilities that have been completed by ES-SYSTEM in Poland and abroad.

“Young people's proper development and health largely depend on the conditions in which they spend their time. That's why the appropriate lighting in school classrooms where students learn affects their well-being, concentration and desire to learn. This improves their ability to focus on their tasks, which translates into positive grades. Light, including artificial light, affects human physiology and behavior in many ways. Western Europe relies on healthy light because prevention is better than the eventual necessity to cure illnesses caused by spending time in unfavorable conditions,” said Rafal Gawrylak, President of ES-SYSTEM.

STATE-OF-THE-ART TECHNOLOGIES IN A STATE-OF-THE-ART SCHOOL

ES-SYSTEM delivered lighting to the SWS De Zoutkamperril elementary school in Zoutkamp in the Netherlands. The company equipped the school with energy-saving lighting with 100% LED technology. Some of the luminaires used included: COSMO FX, LUNA, CANOS and BERSO, which proved to be a perfect fit for the state-of-the-art building.

“The proper selection of lighting for educational facilities is a crucial element in caring for health in society. All ES-SYSTEM products have the appropriate certificates that guarantee the buyer the highest quality, convenient and safe lighting, while ensuring low operating costs. Money spent on of this type of lighting pays for itself in full within a year and a half to several years,” said the President of ES-SYSTEM.

COSMO FX is a series of versatile luminaires for general lighting with easy maintenance and increased resistance to adverse environmental conditions. Thanks to being optimized for LED technology, these products achieve better parameters than those sold by competitive manufacturers, despite their compact size and low weight. COSMO FX is the perfect solution for many lighting applications: from apartments and office buildings to schools and industrial halls.

The LUNA LED luminaire offers unlimited design possibilities because it can be manufactured in any shape and size. This makes the system suitable for use in modern interiors, giving them an exceptional character. The luminaire is made of a non-toxic and non-flammable material, which additionally guarantees safety and comfort to people in the illuminated interiors. As for BERSO LED, it's a luminaire meant for use in educational facilities, characterized by a very low glare rating (UGR).
