

## ES-SYSTEM'S WHY SYSTEM AMONG THE 20 MOST INNOVATIVE PRODUCTS PRESENTED AT LIGHT + BUILDING 2018

The WHY system was included among the 20 most innovative products presented at Light + Building 2018 in Frankfurt according to the Luxreview ranking, which is the most prestigious and widely read ranking of lighting innovations in the world. This type of recognition confirms ES-SYSTEM's position on the lighting market in terms of innovative technological solutions, energy efficiency, as well as design.

"As a leader in professional lighting with many years of experience on the market, ES-SYSTEM implements the latest technologies to deliver modern lighting systems for various facilities. Luminaires from the WHY series do not cause glare, greatly improving working comfort. This makes them perfect for lighting offices," says Rafał Gawrylak, President of the ES-SYSTEM S.A. Management Board.

"We're very proud that our new WHY system has gained recognition as one of the 20 most innovative products from among 2,600 companies presenting at the Light + Building fair. The WHY system is an example of the direction for development which we have set for ourselves in combining design with technology. It's also an indication of what our

customers can expect in the future from ES-SYSTEM," said Waldemar Pilch, Vice President of the Management Board for business development at ES-SYSTEM S.A.

### A UNIVERSAL SYSTEM FOR INTERIOR LIGHTING

WHY is a system of pendant luminaires for indoor lighting. Products from this series can shine in different configurations, and the side walls have been equipped with efficient light sources with optional dynamic color changing, which makes it possible to illuminate different segments or floors with different colored light. The luminaire doesn't cause glare, which significantly improves working comfort and makes it an ideal choice for lighting office spaces. The delicate shape of the luminaire made of aluminum profile makes it a great fit for both traditional and modern interiors.
